

Modeling, Analysis, and Numerical Approximation: An International Journal of Numerical Analysis

Modeling, Analysis, and Numerical Approximation (MANA) is an international journal that publishes high-quality original research articles in all areas of numerical analysis. The journal is dedicated to advancing the theory and practice of numerical methods for solving scientific and engineering problems.

Partial Differential Equations: Modeling, Analysis and Numerical Approximation (International Series of Numerical Mathematics Book 168) by Hervé Le Dret

Language : English

File size : 10686 KB

Screen Reader : Supported

Print length : 406 pages

MANA publishes original research articles that present new theoretical results, new numerical methods, or new applications of existing numerical methods to scientific and engineering problems. The journal also publishes review articles that provide an overview of a particular area of numerical analysis or that discuss the state-of-the-art in a particular area of numerical analysis.

MANA is an open access journal, which means that all articles are freely available online to anyone with an internet connection. The journal is published by De Gruyter, one of the world's leading publishers of academic books and journals.

Topics Covered

MANA covers all areas of numerical analysis, including:

- Numerical linear algebra
- Numerical optimization
- Numerical integration
- Numerical differentiation
- Numerical solution of ordinary differential equations
- Numerical solution of partial differential equations
- Numerical solution of integral equations
- Numerical solution of inverse problems
- Numerical methods for scientific computing
- Numerical methods for engineering applications

Submission Guidelines

MANA invites submissions of high-quality original research articles and review articles. Submissions should be made electronically via the journal's online submission system.

Articles submitted to MANA should be written in English and should be no more than 10,000 words in length. Articles should be formatted according to the journal's style guidelines.

All submissions will be peer-reviewed by two independent referees. The peer-review process is double-blind, which means that the referees do not know the identity of the authors and the authors do not know the identity of the referees.

Acceptance Criteria

Articles submitted to MANA will be accepted for publication if they meet the following criteria:

- The article presents original research that is not previously published or under consideration for publication elsewhere.
- The article is well-written and well-organized.
- The article makes a significant contribution to the field of numerical analysis.
- The article is appropriate for the journal's audience.

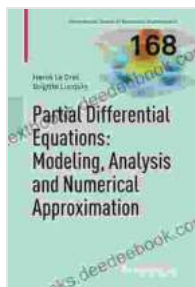

Editorial Board

MANA is edited by a team of leading experts in the field of numerical analysis. The editorial board includes:

- Editor-in-Chief: Professor X.Y. Z.
- Associate Editors: Professor A.B. C., Professor D.E. F., Professor G.H. I.

Contact Information

For more information about MANA, please contact the editorial office at mana@degruyter.com.
