The Organization for Security and Cooperation in Europe (OSCE) is a unique international organization that brings together 57 participating States from Europe, North America, and Central Asia. Its mission is to promote security, stability, and cooperation across the Euro-Atlantic and Eurasian regions.

As part of its mandate, the OSCE conducts a wide range of studies and research projects on topics related to its core areas of focus. These studies play a vital role in informing OSCE's policies and activities, as well as contributing to the broader body of knowledge on international security and cooperation.

History of OSCE Studies

The origins of OSCE studies can be traced back to the Helsinki Final Act of 1975, which established the Conference on Security and Cooperation in Europe (CSCE), the OSCE's predecessor organization. In the years since the Helsinki Final Act, OSCE studies have continued to play an important role in the organization's work. OSCE has established a dedicated research unit, the Conflict Prevention Centre (CPC), to coordinate and support studies and research projects.
